Ultrafast pure fibre broadband is coming

Ewhurst, Ellen's Green and Walliswood

- Action required -

Box Broadband is preparing to build a brand new, next generation, pure fibre optic broadband service in your street.

Phase 1 includes southern Ewhurst, Ellen's Green and Walliswood. We will then extend into the remainder of Ewhurst including Pitch Hill, Forest Green, Rudgwick and many more surrounding communities.

This network is being built as a joint venture between Box Broadband and the local communities. We aim to provide high quality, ultrafast, symmetric broadband to homes and organisations, ensuring all have access to this world-class technology. For example, our mid-range domestic package provides 200 Mbps upload and download to any location for £54 per month inclusive; see www.boxbroadband.co.uk.

We need customers to confirm their intentions now. Once we reach the required number, we can start our roll-out.

We are also offering the local community an opportunity to help fund this venture. The more we raise, the more properties we can connect. For further details please visit www.boxbroadband.co.uk/community.

This is your chance to join the 2% of the UK who already have access to a new broadband experience. Please visit to confirm coverage and select your preferred speed:

www.boxbroadband.co.uk/ewhurst

Or call us on **03301 130 180** - we look forward to connecting you.
